Professional Summary

MSc student in Computer Science and Informatics with hands-on experience in software application development, database integration, and business workflow automation. Developed a C++/Qt desktop application currently used in a professional environment. Interested in building reliable, scalable, and AI-enhanced software solutions.

Education

University of Sarajevo – Faculty of Electrical Engineering *Ongoing*
MSc in Electrical Engineering (Computer Science & Informatics) *Sarajevo, Bosnia and Herzegovina*

University of Sarajevo – Faculty of Electrical Engineering *July 2026*
BSc in Electrical Engineering (Computer Science & Informatics) *Sarajevo, Bosnia and Herzegovina*
Bachelor's Thesis: Advanced Generic Programming Techniques in C++ Using C++20 Concepts
Supervisor: Prof. Dr. Željko Jurić

Experience

ERC ZIPO d.o.o. Sarajevo *176 hours*
Software Development Intern *Sarajevo, Bosnia and Herzegovina*

- Designed and developed a C++/Qt desktop application with SQLite integration to automate recurring business reporting workflows.
- Implemented automatic report classification, metadata extraction, document organization, and missing-report tracking.
- Developed deadline-based reminders and notification features to support timely reporting.
- Delivered an application currently used within the company for daily operations.

Projects

ScenarijPro [GitHub] *JavaScript, Node.js, MySQL, Docker*

- Developed an academic web application involving backend functionality and relational database integration.
- Worked with Node.js, MySQL, and Docker-based development configuration.

FilmMate [GitHub] *C#, .NET*

- Developed a software application as part of the Software Verification and Validation course.
- Applied software testing, verification, and validation concepts throughout the project.

NewsFeedApp [GitHub] *Kotlin, Android*

- Developed an Android news application using Kotlin.
- Integrated an external news API to retrieve and present news content.

YourRide [GitHub] *Object-Oriented Analysis & Design*

- Collaborated on an academic team project focused on object-oriented analysis and software design.
- Applied software engineering principles and collaborative development practices.

Technical Skills

Programming Languages: C++, C#, Java, Kotlin, Python, JavaScript, SQL

Frameworks & Technologies: .NET, Node.js, Qt, Docker

Databases: MySQL, SQLite, Supabase

Software Engineering: Object-Oriented Programming, Generic Programming, Requirements Analysis, Object-Oriented Analysis & Design, Agile/Scrum, Software Verification & Validation, Unit Testing

AI & Automation: AI-Assisted Development, Intelligent Automation, Workflow Optimization

Development & Collaboration Tools: Git, GitHub, GitLab, Bitbucket, Azure DevOps, Visual Studio, Visual Studio Code, Android Studio

Other Tools: SharePoint, LaTeX, Overleaf, Blender

Relevant Coursework

Software Engineering, Object-Oriented Analysis and Design, Software Verification and Validation, Mobile Application Development, Artificial Intelligence, Database Systems, Web Development
